

Metallomspunnen bromsslang

P.T.F.E. SLANG

Produktgrupp 140

Konstruktion:

Innertub: Slät P.T.F.E. (Teflon®)
Armering: Rostfri stålwirefläta
Säkerhetsfaktor: 1:4
Temperatur: -60°C - + 260°C

Användning/Egenskaper:

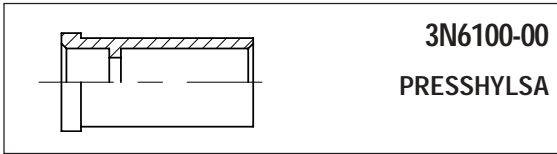

En mycket lämplig slang för krävande miljöer tillsammans med lösningsmedel, färg, bränslen, hydraulolja, livsmedel samt många andra applikationer där hög temperatur, högt tryck, resistens mot kemikalier och elastiska egenskaper krävs. Åldringsbeständig.

Artikel-nummer	ID tum	ID mm	YD mm	Arb.tr. MPa	Böj-rad. mm	Vikt kg/m	Hylsa	Pressmått

Vad är fördelarna med teflonslang som bromsslang?

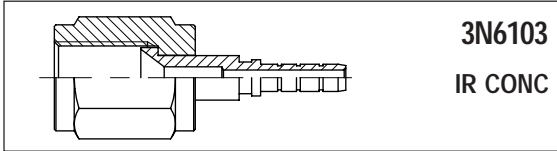

Främsta fördelen gentemot gummislang är att slangen inte börjar "flexa" vid höga temperaturer vilket ger en distinkt kontakt mellan pedal och bromsbelägg, samt att slangen är diffusionstät. Gummislang är inte diffusionstät vilket medför att fukten i luften tränger igenom gummit och blandas med bromsvätskan, det är detta som gör att man kan få rostskador i bromssystemet.

Gummislang åldras, gummit torkar ut med tiden, teflonslangen är åldersbeständig.
