

HS 320 coupling - Thread connection

Product group	524
Security lock	No
Bulkhead	No
Type (Male/Female)	Female
One-handed	Yes
Safety nipple	No
Valve	No
Max temperature (°C)	100

Now Hydroscand's own 320 coupling is in stock! The quick-release coupling replaces Cejns standard 320 coupling (not esafe) where the HS 320 coupling also has a rubber sleeve. Due to the solid construction with rubber sleeve, the clutch does not wear easily and it is non-abrasive to surrounding components. This is an affordable coupling operated with a single hand, which makes the clutch very easy to connect to other pneumatic driven devices. The coupling is suitable for workshops where there is a need for easy and quick connection and disconnection to different compressed air tools. Industries that need a simple connection for machinery and equipment powered by compressed air, benefit from this user-friendly coupling.

Part no	Thread type	Thread	Weight (kg)
55522812	G	G 1/4" Female	0.1
55522815	G	G 3/8" Female	0.12
55522816	G	G 1/2" Female	0.1
55522822	R	R 1/4" Male	0.1
55522825	R	R 3/8" Male	0.11
55522826	R	R 1/2" Male	0.12
