

External skiving tool - EST

Product group

900

This is a very robust and sturdy skiving tool with high performance and long lifetime. EST is suitable for spiral and braided hoses from 3/16" to 2". A complete tool consists of a holder with one arm, a mandrel, and an external skiving knife. On EST double there is an extra arm, and two external skiving knives. To reduce time for setting we recommend to use one tool for each dimension. The mandrels are made of hardened steel and the skiving knife has four sharp edges.

Part no	Designation	Mandrel
90220000	Holder to skiving tool + 1 handle	-
90220001	Short handle	-
