Twinskive 5-50

Product info	External and internal
Product group	900
Height (mm)	1,080
Length (mm)	1,200
Width (mm)	680
Ampere	16
Hertz	50

TwinSkive is a semi-automatic PLC-controlled skiving machine for external and internal skiving at the same time. The machine can easily reduce your skiving time by 50% and is very reliable and easy to use. A centering system assures that the hose is correctly aligned during the entire skiving and inserting process. The machine can also be used for inserting fittings and internal or external skiving separately.

Part no	Hose size (Inch)	Skiving capacity	Motor size 3 phase (kW)	Voltage Volt	Velocity (rpm)
